PUT A STOP TO FOUL ODOURS WITH **BAC2WORK**

Formulated with advanced biologically active ingredients to digest and consume the organic soilage and uric acid salts found in and around toilets, urinals, toilet floors and walls.

LET'S TALK WHAT IS BAC2WORK?

BAC2WORK removes the "food" for bad-smelling bacteria, BAC2WORK completely deodorises toilets and urinals that have had a history of bad odours and generating complaints from people using the facilities.

BAC2WORK has a sustained action that keeps it working as long as soilage is present, so it keeps on cleaning and deodorizing even after the cleaner has left the room. BAC2WORK is classified as Non-Hazardous according to the criteria of Safe Work Australia.

BAC2WORK 1L **BAC1**
BAC2WORK 5L **BAC5**
