

SANITISE PORTABLE TOILETS WITH **PORTACARE**

Portacare is recommended for use in the waste tanks of portable toilets and cassette toilets, as well as in bus and aircraft holding tanks.

Ideal for caravans, campers and coaches.

LET'S TALK WHAT IS PORTACARE?

Portacare is a blue liquid sanitiser designed as the waste tank additive for portable toilets, sewage holding tanks and sanitary pan systems.

Portacare includes surfactants, which are tiny particles that work on a large molecular level to clean dirt and waste. These particles lower the solution's surface tension, effectively dealing with and wrapping up dirt and organic materials. This separation makes it easy to wash away the treated waste.

Portacare 5L **POR5**
Portacare 1L **POR1**

KEY BENEFITS

**BREAKS DOWN
SEWAGE**

Breaks down sewage content and toilet paper quickly

**CONTROL
BACTERIA LEVELS**

Controls bacteria levels thereby reducing gas build-up

**CITRUS
FRAGRANCE**

Fragranced with fresh citrus to eliminate unpleasant odours

**HARMLESS
TO TANK SEALS**

Will not harm tank seals so they last longer

WHEN & HOW TO USE

Portacare can be used to rinse out portable toilets.

Portable Toilets

Add 75mL per 10 litres of waste tank capacity. Then add 2 litres of water if a portable toilet or 3 litres of water if a cassette toilet.

Note:

Its preferred a waste tank be emptied once a week, if longer intervals are required a higher dose of 120ml-150ml per 10 litres can be added.
