LOOKING FOR POWERFUL CLEANING? LOOK FOR **VISCHLOR**

VISCHLOR is designed for use in most applications and tasks in open area cleaning of food factories. It can be used to clean all surfaces not harmed by water and chlorine including stainless steel equipment.

LET'S TALK

WHAT IS VISCHLOR?

VISCHLOR is a high-strength foaming dual-action cleaner and sanitizer with powerful alkalinity for use in food-processing facilities. It quickly dissolves oil, hardened fats, protein, starch, grease, smoke and food residues from hard, washable surfaces.

VISCHLOR produces a high volume of stable foam for extended contact time and better soil removal. It is ideal for foam-gun application and works in both hard and soft water.

VISCHLOR 5L **VIS5**
VISCHLOR 15L **VIS15**

KEY BENEFITS

KILLS BACTERIA ON HARD SURFACES

Kills bacteria on hard surfaces at food processing areas

CLEAN & SANITISE WITH DUAL ACTION

Strengthened food grade cleaning and sanitising foaming detergent
